AUTONOMOUSSTUFF

Today's Products for Tomorrow's Solutions

[FREE Intelligent Vehicles Webinar](#) (February 1st)

AutonomouStuff, LLC is continuously researching the latest technology developments within the automotive industry. We have recently partnered with one of the most respected international experts in the Intelligent Transportation Systems (ITS) industry, who specializes in connected vehicles and active safety technology for cars, heavy trucks, and buses.

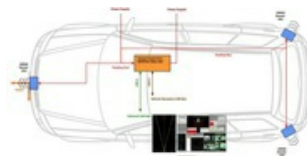

AutonomouStuff has taken this knowledge and put together a FREE 45 minute webinar that provides a high level overview of the latest in the intelligent vehicles industry.

New Releases! OUTDOOR Rated Multi-Echo Hokuyo LIDAR with an ETHERNET Interface

Hokuyo UTM-30LX-EW

The NEW IP67 rated Hokuyo UTM-30LX-EW Scanning Laser Rangefinder is a small, affordable and accurate laser scanner that is perfect for small robotic applications. The UTM-30LX-EW is able to report ranges from 100mm to 30m (1mm resolution) with a 270° horizontal field of view (0.25° angular resolution). It's very low power consumption (12V-700ma) allows it to be used on battery operated platforms.

Considering the UTM-30LX-EW has a size profile comparable to a standard credit card, its ability to map objects up to 30m away is remarkable.

Click [here](#) for more details

Hokuyo UXM-30LX-EW

The Hokuyo UXM-30LX-EW Scanning Laser Rangefinder is in many ways Hokuyo's most farsighted scanner. Normal objects can be seen up to 50m away, while those difficult to see "low reflectance" objects (10% reflectivity) can be seen from a distance of around 30m. Additionally, the multi-echo functionality ensures that low level "noise" caused by adverse weather conditions such as snow, rain, fog and dust, is filtered out.

The UXM-30LX-EW is available with USB or Ethernet connectivity and weighs in at less than 800g. It's enhanced outdoor performance enables the UXM-30LX-EW to be utilized in larger mobile robots and intelligent AGV's.
